answers to your questions about sex and relationships

## sexual health

### BY THE NUMBERS AT THE UA

Have you ever wanted to know about the sexual health behaviors of your peers? Well you're in luck! The UA Campus Health Service administers a health and wellness survey every spring to UA students. Questions range from demographics, GPA, and sleep health, to alcohol use, sexual health, stress, and more.

Here's a snapshot of some of the sexual health data points from 2015 (n=2,705).\*

Of all UA undergraduate students:

- 74%** have had oral sex
- 70%** have had vaginal intercourse
- 23%** have had anal intercourse
- 72%** have had either one or no sexual partner(s) during the past school year
- 59%** had one vaginal/anal sexual partner during the school year (among sexually active)

**68%** usually or always use a condom (among sexually active)

**38%** have been tested for STIs within the last year (among sexually active)

**62%** have NOT been STI tested within the last year (among sexually active)

Campus Health is here for your sexual health needs. We offer medical services including confidential STI testing and treatment, exams, and a women's health clinic. Our full service pharmacy offers prescription birth control methods and sexual health products such as condoms, pregnancy tests, lube, and emergency contraception. If you have sexual health questions, you can call (520) 621-4967 to speak with a health educator. And don't forget – every Friday is Free Condom Friday from 12-2pm at Campus Health!

\* Numbers have been rounded to the nearest whole number.
