**FREE
CONDOM
FRIDAY!**

Free Condom Friday happens every Friday from 12-2pm during the Fall and Spring semesters at UA Campus Health, 3rd Floor, Health Promotion.

SPRING 2016 WILDFACT EDITION

- **1 in 2:** Odds that a sexually active person will get an STD by age 25. Most won't know it.
- **Just before Spring Break or Christmas:** The time of the year when most breakups occur, according to Facebook status updates.
- **Sex frequency and number of partners:** Contrary to popular belief, college students today aren't reporting higher numbers of these compared to students who were in college before the rise of app-based and online dating, according to a national study.
- **867:** Number of UA students who stopped by Free Condom Friday at UA Campus Health last year.
- **99%:** Percent of UA students who used Campus Health and would recommend it to a friend.
- **59%:** Percent of UA students who had received the HPV vaccine, which protects against cervical, penile, and oral cancers, as well as genital warts.
- **March 11, 2016:** Date the Utah legislature passed a resolution declaring pornography a "public health crisis," the first state to do so.
- **31:** Number of states in the U.S. that do not require information on contraception in their school-based health education curriculum.
- **45:** Number of unplanned pregnancies per 1000 women aged 15-44 in the U.S. This represents an all-time low in the rate since tracking began in 1981.
- **5-fold:** Increase in IUD (intrauterine device) usage between 2002 (2%) and 2012 (10.3%) among female contraceptive users aged 15-44.
- **54%:** Percent of Tinder users who are single.
- **35%:** Percent of UA students in 2002 who reported being single and not dating.
- **48%:** Percent in 2015 who reported being single and not dating.
- **2%:** Percent of men who said they started a relationship with someone they met at a bar or club.
